

Work procedure – Notification of quarantine or isolation for students

A student in quarantine/isolation

The student notifies the school office about the quarantine/isolation. The student also records illness on Inna, on the first day, and notes that he/she is in quarantine/isolation and for how long. This is only done once.

The school office sends an e-mail to the teachers of the student in question and the student attends to his studies through the school's electronic learning environment.
