

Work procedure – Infection or suspicion of infection of COVID-19 in students

Student suspicion of infection/symptoms

Student goes home or someone fetches him/her and guardians are contacted. Toilets and other contact surfaces are disinfected. If the student is not infected he/she stays at home until all symptoms have disappeared.

Student infected with COVID-19

Student or guardians notify school authorities. Consultation with disease control authorities about the next steps regarding the school work. A decision made regarding quarantine for other students and staff.

A student closely related to an individual with COVID-19

Student goes to quarantine and does not attend school. An observation is made to see if other students are at risk of infection. Disease control authorities are consulted along with the home in question.
