

Dear parents / guardians

Now the final exams for the fall term are approaching and lately most student in MH have had a full schedule. There are papers to turn in, chapter exams and various assignments to finish before the end of term. The first exam will be on December 3rd. We want to encourage you to show interest in your teenagers studies and support them as much as you can. Many studies have shown that support and encouragement from parents make a real difference in the students performance in her/his studies. Help them when needed, encourage them to study and put their studies in first place and do not forget the importance of a healthy nutrition and a good nights sleep.

There are always some students that need special measures during exams and we will try to fill those needs. In MH it is possible to ask for permission to take an exam in a class room rather than in the hall. Students who have dislexia can ask for colored exam sheets or for the exam on an audio file. This will be available to those who have a diagnosis of some kind, if you have a medical certificate from a doctor / psychologist or if you have had regular contact with MH's school counselors.

Applications for special measures (Sérúrræði) need to be made on INNA. See overstrike below.

Then the following window will appear:

Register special resources

Module based special resources: Registrations is only valid for modules on the ongoing term. Here you should only register special resources that are not valid for all modules.

There is no need to apply for a longer exam time, only colored sheets, reading or a class room (12 students per class room in stead of beeing in the hall).

Applications for special measures need to made before November 15 th will be confirmed after an interview with a school counselor. For further questions contact the school counselors of MH.

Best regards
